  - Emergency Center Curbside screening (8 locations) (severe symptoms only/not testing for children 12 and under) *curbside does not guarantee testing*
  - Most people with confirmed or suspected COVID-19 can self-treat at home.
    - Self-treatment includes lots of fluids, rest and over-the-counter medications, like pain relievers.
      - Stay home for 7 days from the beginning of symptoms plus 3 days after symptoms resolve.
      - Presently, there is no vaccine or prescription medication to prevent or cure the virus.
      - According to the World Health Organization, 80% of people who contract COVID-19 recover without requiring hospitalization
